

Luca

LGR

NAV

Het model LUCA is a trendy closed shoe, fully adapted to the needs of healthcare professionals. The laces make the shoe sit firmly on the foot. This closed model protects the whole foot.

The soft nylon inner lining makes it very comfortable. The outer material consists of high-tech 3D mesh and elastic nylon for maximum flexibility and ultimate comfort. This shoe is designed with the high technology *Oxygrip*[®]-slip resistant sole, that is conform to the highest slip resistant standards on dry, wet and greasy floors. The sole also has anti static features. The anatomical shaped foot bed and outsole that touches the ground at any point, ensures a healthy support of the foot.

The trendy Oxyfashion collection has anti static features and slip resistant soles.

Luca

CE-norm
CE EN 20347 certified.

Soft Inner Lining

Shock Absorbing

The midsole in EVA provides extra shock absorption.

Ultra Light

The EVA midsole is very light and flexible. The average shoe weight is 8.81oz or 250 gram.

3D breathable mesh and elastic nylon

The upper is in high-tech 3D mesh and elastic nylon for maximum flexibility and ultimate comfort.

Memory Foam

Renewable Insole

The renewable *memory foam* insole provides excellent walking comfort. If needed you can replace it with your own orthopedic insole.

Anti-static ESD

The shoe features a plug that improves the dissipation of static electricity and meets the ESD standard.

Slip Resistant SRC

The rubber **Oxygrip**-technology outsole provides excellent grip on dry and wet floors and is conform to the SRC standard.

Test Results Oxygrip®-sole
